## Blog

### Work with Wordpress Blogs on Azure Web Apps

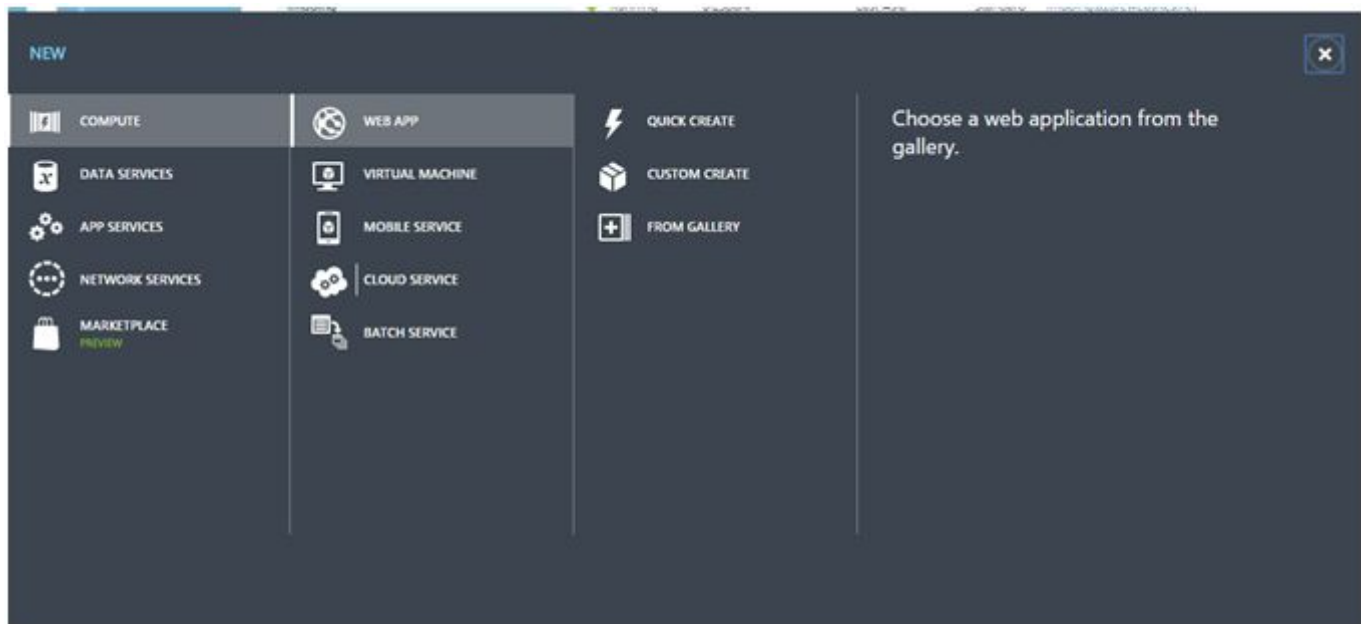

By [Abdul Rasheed Feroz Khan](#) on Jun 23 2016

Follow the below steps to create a Wordpress Blog with Azure Webapps:

#### Step 1

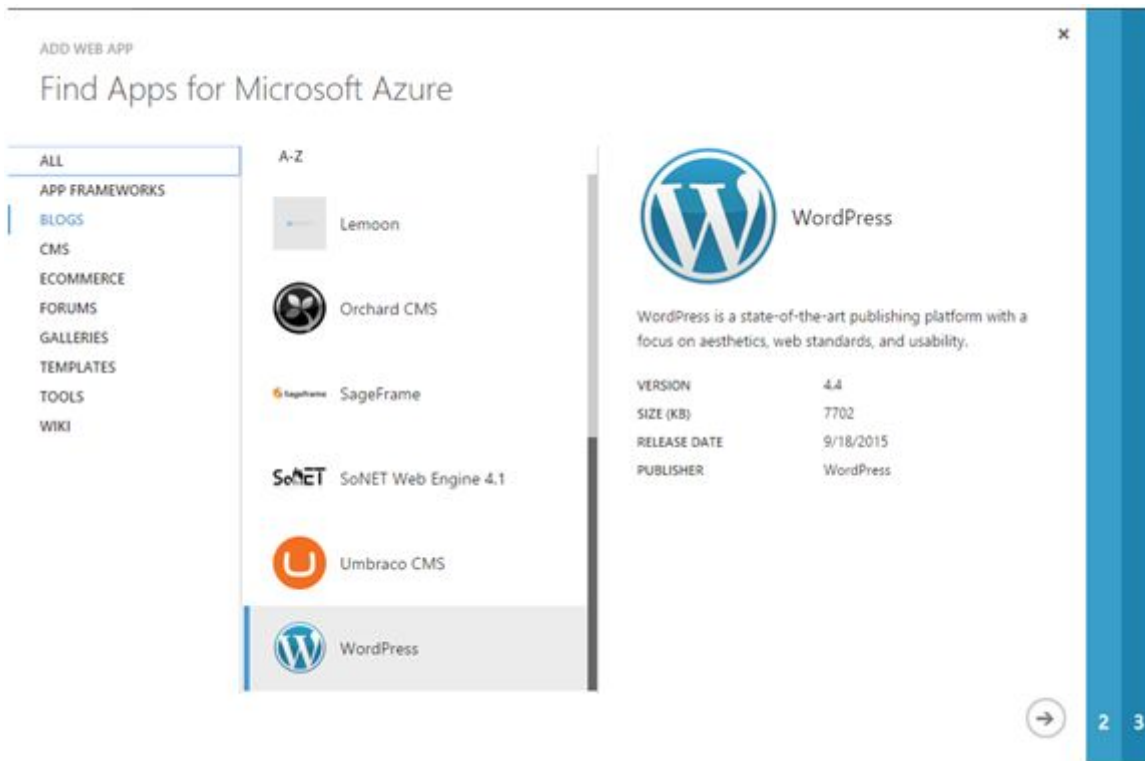

Click on New option from the bottom-left corner.

New -> Compute -> Web App -> From Gallery (Ready templates are available by category).

#### Step 2

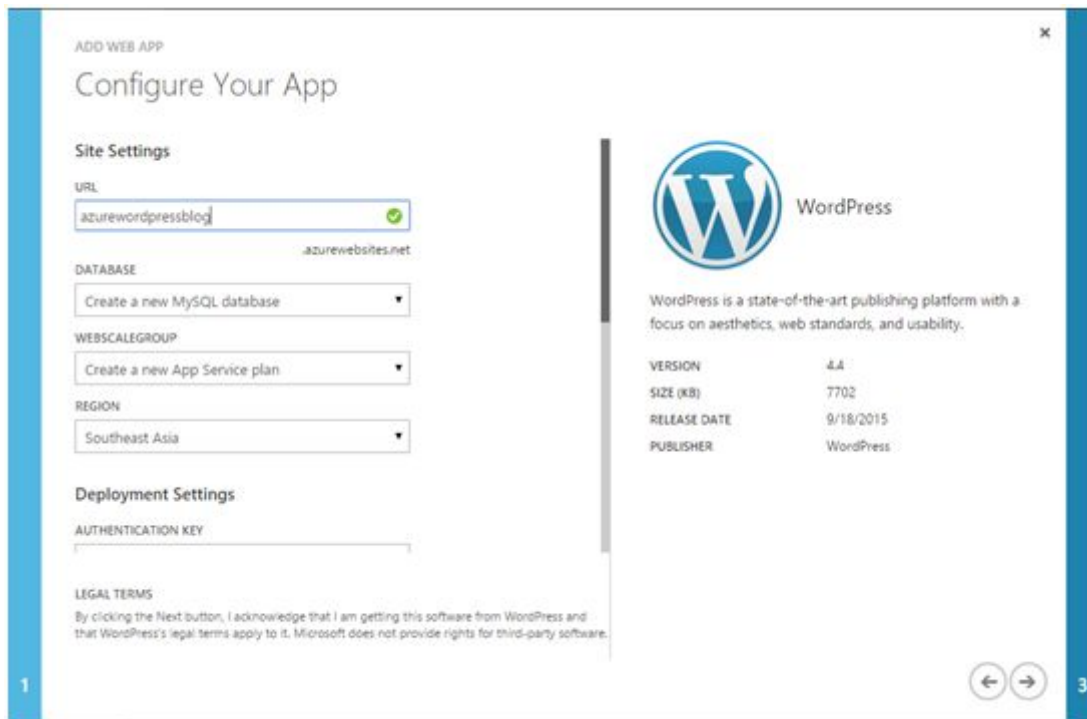

Select “Blogs” from left side and it will display supported templates. Click on “WordPress”.

### Step 3

Configure App options available.

Enter WordPress url, choose database, app service plan, and region.

### Step 4

MySQL database name and database region are available. Also you can change the database name. Tick mark on "I Agree" option.

ADD WEB APP

New MySQL Database

NAME  
azurewvoAOwslzaFX

REGION  
Southeast Asia

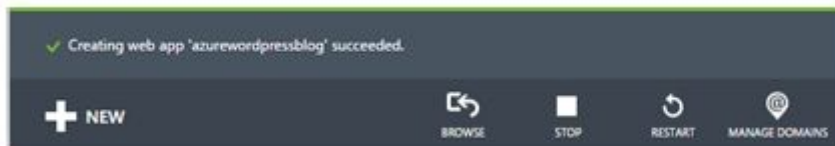

☒ I agree to ClearDB's legal terms and that Microsoft will transfer my subscription and contact information to ClearDB. See also ClearDB's privacy statement.

1 2

←

✓

Wait for a few seconds. WordPress installation process is going onto Azure.

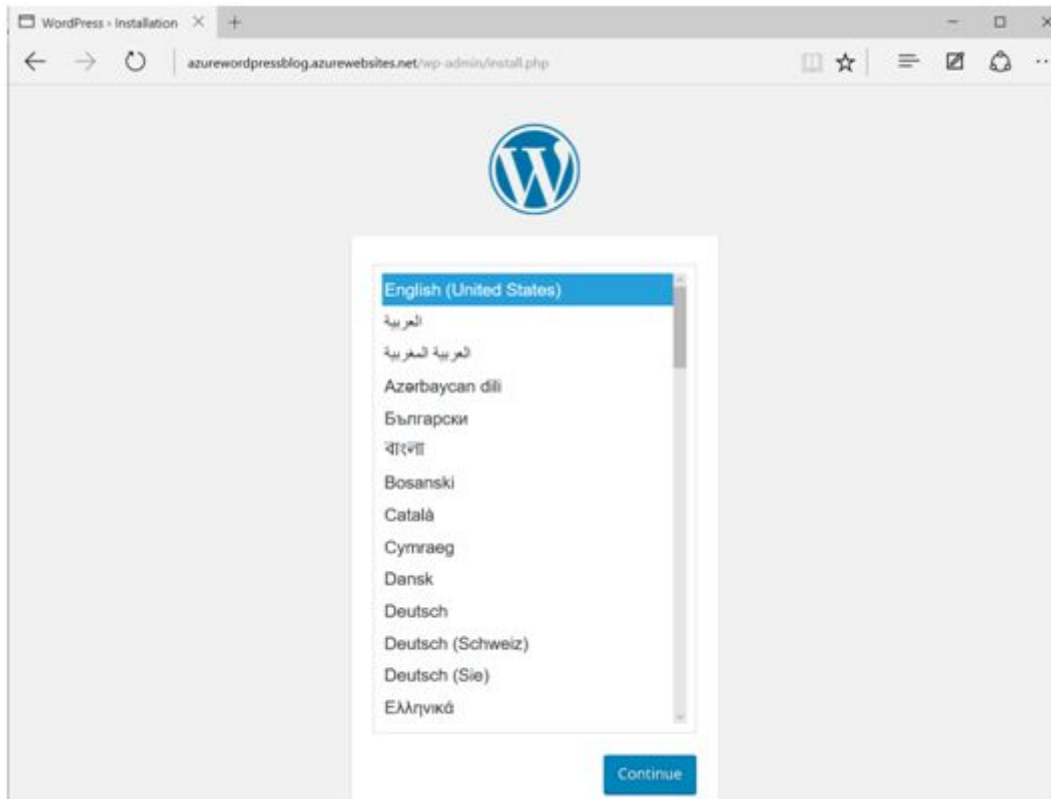

## Step 5

Now click on Wordpress url.

web apps					
NAME	STATUS	SUBSCRIPTION	LOCATION	PRICIN...	URL
azurewordpressblog	✓ Running		Southeast Asia	Free	azurewordpressblog.azurewebsites.net

Choose Preferred Language.

## Step 6

Enter Site Title, Admin Username, Password, Email Id.

Click on “*Install WordPress*” button.

## Information needed

Please provide the following information. Don't worry, you can always change these settings later.

Site Title

WordPress Blog

Username

microsoftazure

Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.

Password

.....

Show

Very weak

Important: You will need this password to log in. Please store it in a secure location.

Confirm Password

☒ Confirm use of weak password

Your Email

.....@hotmail.com

Double-check your email address before continuing.

Search Engine  
Visibility

☐ Discourage search engines from indexing this site

It is up to search engines to honor this request.

Install WordPress

## Success!

WordPress has been installed. Were you expecting more steps? Sorry to disappoint.

Username

microsoftazure

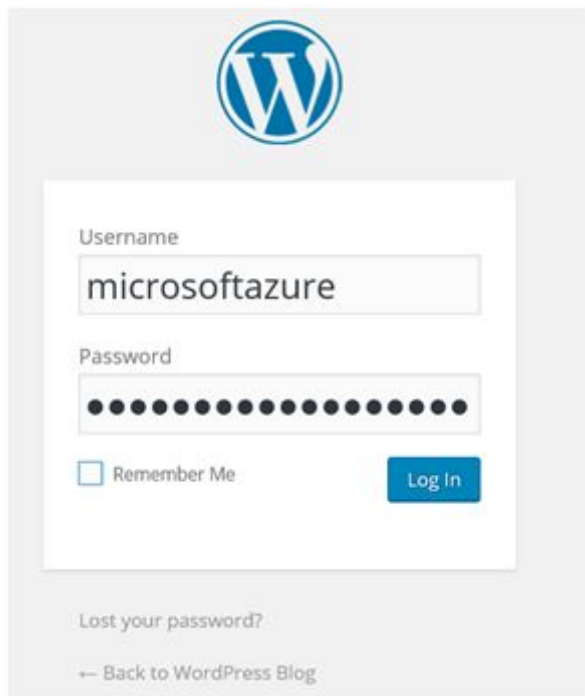

Password

Your chosen password.

Log in

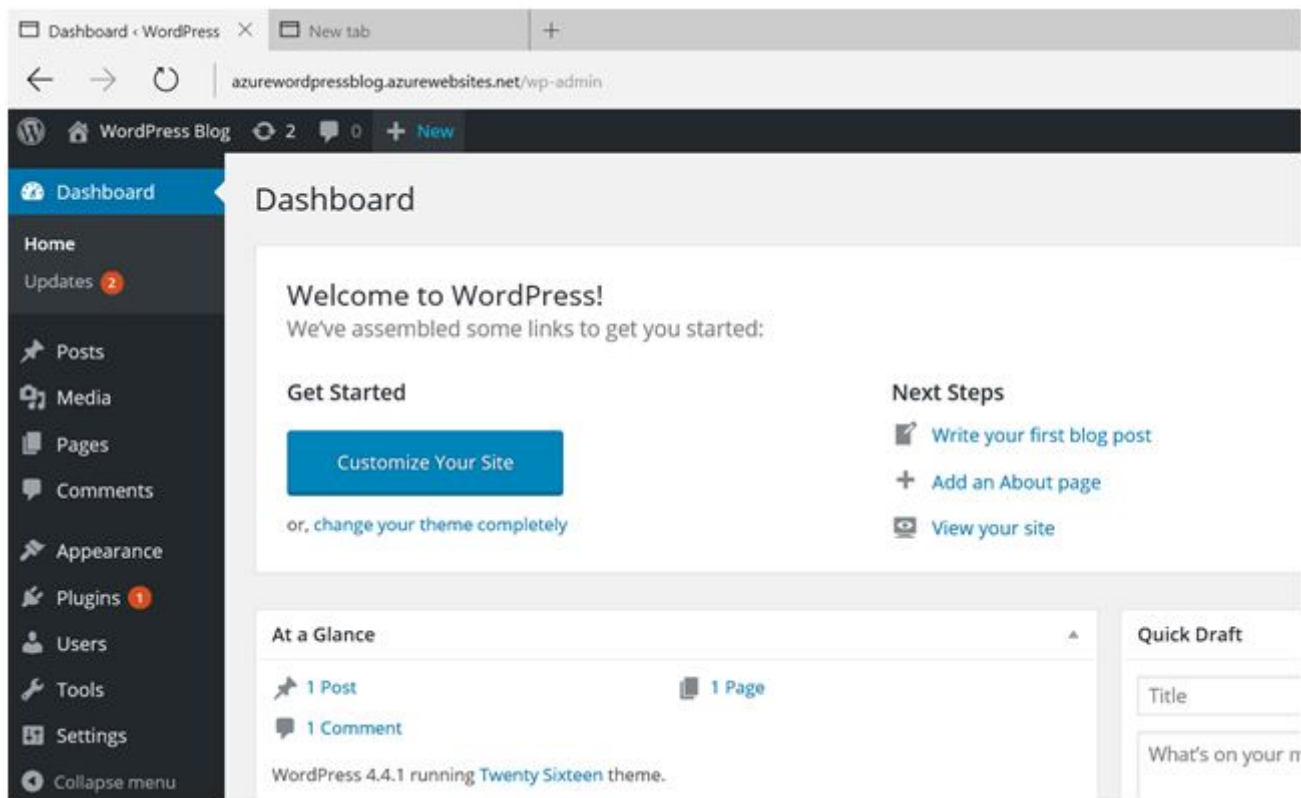

### Step 7

Click on "Login" button. Enter WordPress admin username and password

The image shows the WordPress login interface. At the top is the WordPress logo. Below it is a white box containing the login form. The form has two input fields: 'Username' with the text 'microsoftazure' and 'Password' with a masked password of 12 dots. Below the password field is a checkbox labeled 'Remember Me' and a blue 'Log In' button. At the bottom of the white box is a link 'Lost your password?'. Below the white box is a link '← Back to WordPress Blog'.

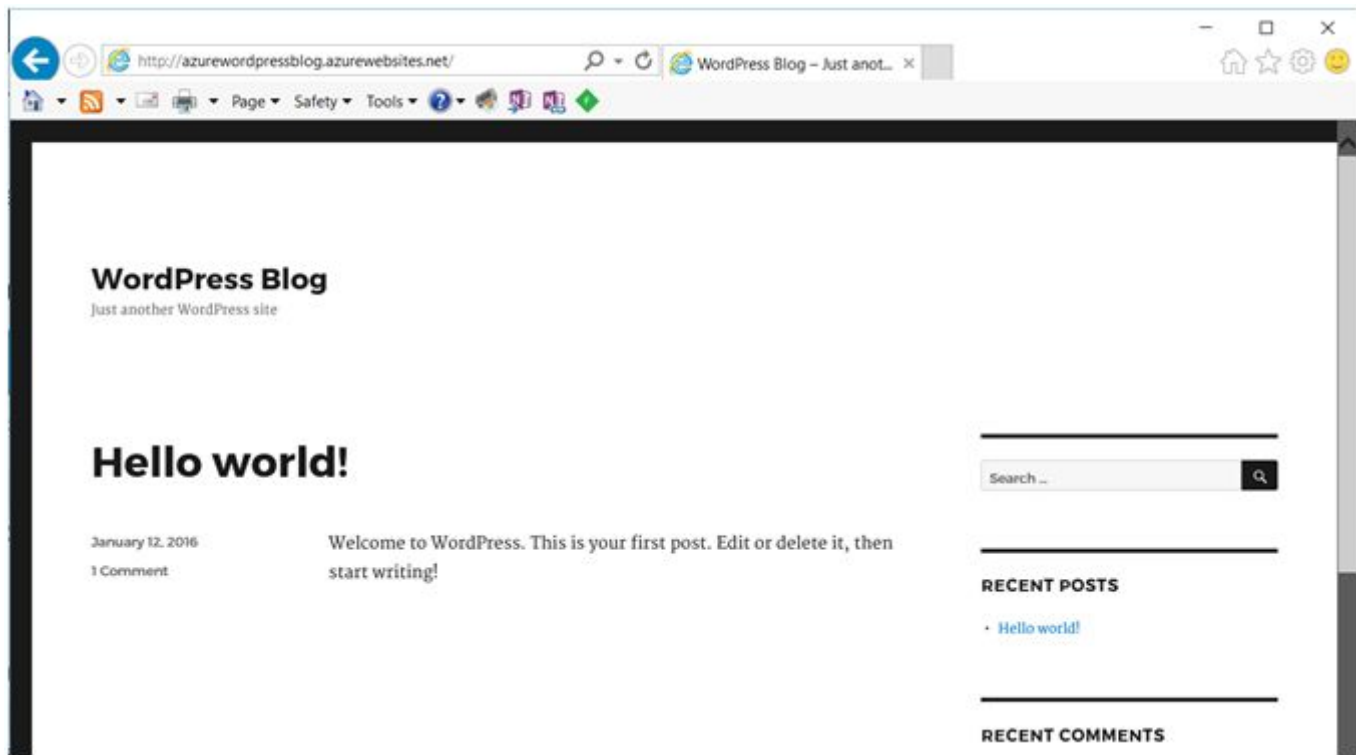

WordPress Dashboard.

The image is a screenshot of the WordPress Dashboard. The browser address bar shows 'azurewordpressblog.azurewebsites.net/wp-admin'. The dashboard has a dark sidebar on the left with a menu: Home, Updates (2), Posts, Media, Pages, Comments, Appearance, Plugins (1), Users, Tools, Settings, and Collapse menu. The main content area is titled 'Dashboard' and features a 'Welcome to WordPress!' message. Below this is a 'Get Started' section with a 'Customize Your Site' button and the text 'or, change your theme completely'. To the right is a 'Next Steps' section with three links: 'Write your first blog post', 'Add an About page', and 'View your site'. At the bottom, there is an 'At a Glance' widget showing '1 Post', '1 Page', and '1 Comment', and a 'Quick Draft' widget with fields for 'Title' and 'What's on your mind'.

Add WordPress plugins, change theme, and other options.

After changes please run the Wordpress blog.

Also it is responsive so the website will adjust according to mobile screen.
